

Canwood Street Improvements

In our efforts to maintain and enhance quality of life in our community, the City of Agoura Hills is initiating some essential projects to improve safety and traffic flow. This notice is to provide you with key information about the nature of this project and its potential impact on your neighborhood.

To ensure our residents and visitors move about safely and easily in their daily business, design plans have been developed for the widening of Agoura Road and road improvements for Canwood Street.

The first project will take place on Canwood Street beginning in April of this year. While some upcoming projects may create temporary inconveniences, the long-term benefits will provide sustainable and needed solutions for our community's future.

Traffic Controls:

One lane will be open in each direction on streets under construction. There will be very short periods of no access to allow for the movement of construction materials, vehicles and personnel.

Business Access:

Access to and from commercial and residential driveways and parking lots shall be maintained at all times, except when performing items of work, which cannot be accomplished without access restriction.

Parking & Notices:

The city will post door hangers, construction signs, and "No Parking" signs to keep you informed about the road-work and parking restrictions on your street. Refuse and recycling collection will continue as scheduled, unless you are notified of a change.

Project Description:

Rehabilitation of Canwood Street, from Reyes Adobe Road to just east of Strawberry Hill Road. This rehabilitation project will include restoration of the pavement as well as needed stabilizations to the surrounding slopes. This project will fix an issue of subsurface soil movement on this portion of Canwood Street that causes cracks visible on the pavement surface.

Project Area:

Canwood Street, between Reyes Adobe Road and approximately 1,050 feet east of Forest Cove Lane.

Project Dates:

April 15 through June 30, 2013.

Hours:

Monday through Friday between 8:30 a.m. and 5:00 p.m. Noise level restrictions will be in place. Additional information will be provided as the project progresses.

DATES, HOURS AND LOCATIONS ARE SUBJECT TO CHANGE.

Funding Provided By:

This project is included in the Metropolitan Transportation Authority's (Metro) Long Range Transportation Plan, which was approved in 2009. The projects we are pursuing are guaranteed funding as part of Metro's priority list of projects funded within the first ten years by Measure R.

*Project area shown is approximate and for visualization purposes only.
